

(a) Real

the recorded traffic
of the commanded
flight

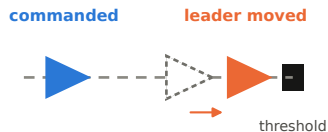

(b) A: inserted

inserted

one more flight, shifted
to land within 180 s of
the commanded one

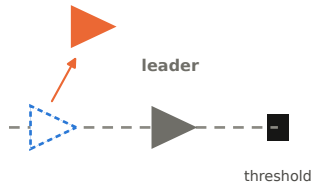

(c) D: leader moved

the aircraft ahead is
shifted in time by
-120 s to +120 s

(d) B: start moved

commanded, moved

the commanded aircraft's
turn $\pm 15^\circ$, height ± 300 m,
speed $\times (1 \pm 0.1)$

The commanded aircraft is always the one that speaks; the others fly their records. A round draws the four kinds from the same flights.
