

1 a window

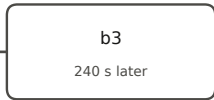

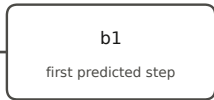

three command aircraft; v3 landed (r = 1): not varied

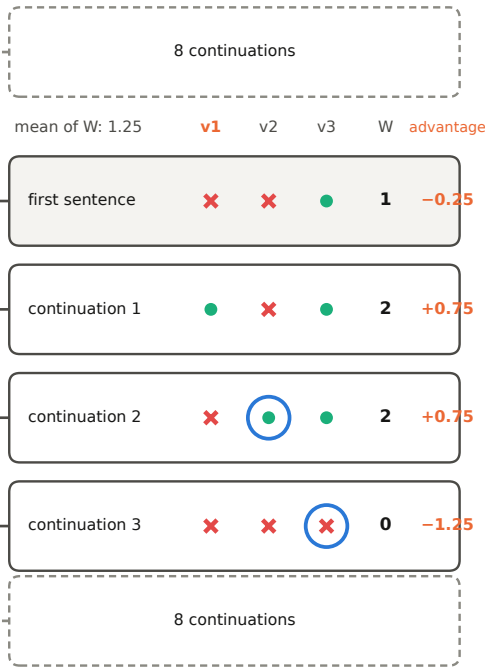

2 who is varied

3 branch point

4 the sentences of the group

Down a branch: the state of the whole window is copied at the branch point, and only the varied aircraft draws new random numbers. The other aircraft keep theirs, but their situation changed, so they can answer (ring): v2 in continuation 2 lands, v3 in continuation 3 fails.
