

(a)

	KMSY	KRDU	airports KSJC	KSMF	KSTL
fold 1	read	train	train	train	train
fold 2	train	read	train	train	train
fold 3	train	train	read	train	train
fold 4	train	train	train	read	train
fold 5	train	train	train	train	read

(b)

- 4 configurations × 5 folds** 20 runs
variant "full": choose the configuration with the fewest parameters within 2 seed scales of the best
 - configuration A, second seed** 5 runs
gives the seed scale
 - variant "constants", chosen configuration** 5 runs
chosen only if better than "full" by more than 2 seed scales
 - the base on all five airports** 1 run
stopped on the select days; the val days are read one time
- 31 training runs in one campaign; the score of a run is the mean per-step loss on the held-out airport
